

Tiny Picture Light

TINY PICTURE LIGHT, designed and manufactured in France, is a real novelty in picture lighting. Designed by the LED-NER laboratory, four international patents protect this product with exceptional features: diameter of 6mm, 3400lm per meter, CRI 96/98, TM30>90, perfectly homogeneous angle of 120°.

TINY PICTURE LIGHT offers extremely small dimensions which allow a discreet lighting for small size paintings. The back support can be mounted on the painting or on the wall. The height and depth are adjustable and can be fixed using small screws.

TINY PICTURE LIGHT is available in black or brushed brass finish. A secondary shade is also available.

ELECTRICAL SPECIFICATIONS

Voltage	24V DC
Power	3W/100mm
Regulator	-
Dimming control	1-10V, DALI, DMX...
Class	III

PHYSICAL SPECIFICATIONS

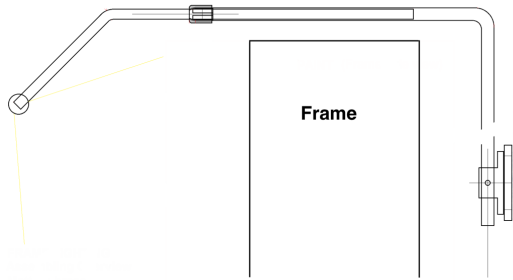

Support diameter	4mm and 6mm
LED light diameter	6mm
